

CBRNe^{14th}

PROTECTION SYMPOSIUM

SCIENCE FOR SAFETY & SECURITY

Meet us at the Exhibition of CBRNe protection equipment in Malmö

We will be exhibiting during the 14th CBRNe Protection Symposium 20th - 22nd September 2022 in Malmö, Sweden, and would love to meet you there!

How about a look at the newest commercially available state-of-the-art equipment related to CBRNe protection or to talk with industry and institutes about their latest products and research in an inspiring environment? And while you are there, why not listen to invited distinguished speakers and other scientific presentations?

The CBRNe Protection symposium is held every third year with approximately 700 attendees coming from 30 different countries around the globe. The Swedish Defence Research Agency (FOI) is co-organizing the symposia with a number of Swedish government agencies to create the best symposia there is, with both the width to cover all topics, and the depth covering the latest research in the CBRNe protection field.

The scientific program will include keynote lectures by distinguished speakers, parallel thematic sessions throughout the symposium and presentations.

By gathering friends, colleagues and stakeholders, this symposium will constitute a great platform for scientific discussions and technical demonstrations within the entire CBRNe field.

More information on the 14th CBRNe Protection Symposium can be found on the symposium website, www.cbrnesymposium.se.

Early bird registration will be open until April 30th. Registration closes August 31st.
